BCTRA Live Timing

BCTRA has recently adopted electronic timing and scoring (transponders) to provide racers with accurate and timely scoring. Electronic scoring expedites scoring, especially at the Timonium Indoors, where lap times are 7 seconds on average. Imagine how difficult it is to manually score a race with 10 riders, each with a 2 or 3 digit number, and doing 7 second laps. Our scorers must accurately write 20-30 digits in 7 seconds! If riders start getting lapped or falling down, the overall scoring of the race gets “interesting” to tally. Electronic scoring allows for accurate scoring as now our scorers don’t have to review race video’s to accurately score an event in the event of issues that may lead to inaccurate scoring of a race.

We are now ready to make the next move forward and starting at the Timonium Indoors in December we will be feeding the live timing to the Internet. What this means to you is your smartphone can get lap times and scoring live as practice or race is happening. This can be used by spectators as a way of tracking your favorite racer, following the race leader, or used by riders as a tool for tuning your bike and making gearing changes.

Here’s how to get BCTRA Live Timing on your phone:

- Login onto <https://speedhive.mylaps.com>
- Create a free account
- Download the free Speedhive app from the Apple Store or Google Play
- Log in to the APP with your username and password
- On the top banner, choose **MX** as your Sport
- On the bottom banner choose **Live Timing**
- Look for **BCTRA Timonium Indoors** to get Live Timing
